

Dract: Python with Web - ProMan / Product Backlog (User Stories) - Product Backlog

ID	Story Title	User Story	Acceptance Criteria	Business Value	Estimation	Status
1	Development / Create an environment	As a Developer, I want to have an environment, where a Python webserver serves a static HTML page with JavaScript, So that I can avoid issues with running JavaScript locally in a sandboxed environment	Given I start up my Python application server When I open localhost on the port it's running in my browser Then ensure the server gives back an empty page And ensure the HTML page loads a blank JS file	100	1	Done
2	Boards / List page	As a User, I want to have an overview page, where I see the list of already created Boards, and I can create new ones So that I can categorize my Cards underneath them later on	Given my application server is started, When I open the root url (/) Then ensure I can see a list of my already created boards (as boxes with their name on it) And ensure that there's a "Create new board" box And ensure if I click on it, I can give my new Board's title And ensure if I press save, my Board gets saved in the browser's local storage and gets displayed in my Board list And ensure if I reload the page, my Board is still displayed	1000	8	Not started
3	Boards / Detailed page	As a User, I want to have a detailed board page, where I see the list of already created tasks, and I can create new ones So that I can organize my life around them	Given I have a Board in the system, When I click on it Then ensure I get to the Board's detailed page And ensure I can see the Board's title on the top of the page And ensure I can see a list of my already created Cards on that Board (as boxes with their name on it) And ensure that there's a "Create new card" box And ensure if I click on it, I can give my new Card's title And ensure if I press save, my Card gets saved in the browser's local storage and gets displayed in my Card list	1000	4	Not started
4	Cards / Order	As a User, I want to have an order between my cards, So that I can set the priority between them	Given I have a Board in the system and I'm on the Board's page, When I have Cards created in that Board, Then ensure there's an order attribute on the Card, And ensure that the Cards are displayed by their order, And ensure I can reorder the Cards by drag and dropping them, And ensure that their new order gets saved	500	4	Not started
5	Cards / Statuses	As a User, I want to have statuses for my cards, So that I can set the progress of them	Given I have a Board in the system and I'm on the Board's page, When I have Cards created in that Board, Then ensure there's 4 predefined lists represented as containers named as new, in progress, review, done And ensure I can drag and drop those Cards between the lists, And ensure the Cards status field is updated with the list title And ensure the Cards get saved after dropping them into a list	600	3	Not started
6	Cards / Edit title	As a User, I want to edit my already created cards' title So that I can update them when needed	Given I have a Board in the system and I'm on the Board's page, When I have a Card created in that Board, Then ensure I can press an icon on the Card's box, And ensure if I press it, my Card get's into edit mode And ensure I can modify the Card's title And ensure I can save my modifications	300	3	Not started
